

IP Address Request and Justification Form

Note: Completion of this form is mandatory when requesting more than 2 IP addresses.

Hargray Communications, Inc. abides by the policies of the American Registry for Internet Numbers (ARIN) regarding IP address allocation. As part of standard service provided, Hargray will assign the amount of IP addresses that customers can justify for use on their equipment. Written justification for any IP addresses requested is required so that we can demonstrate to ARIN that IP addresses allocated to Hargray are used efficiently.

As you may be aware, the depletion of the IPV4 Internet has made legacy IP addresses difficult to obtain, and ISPs are not receiving additional allocations except under special circumstances. As such, we appreciate your diligence and honesty in the request for these resources.

Please complete and sign the form then submit via email to (or if you have any questions about filling out the form contact): static_ip@hargray.com

Organization/Company name:		
Address:		
City:	State:	Zip:
Phone:	E-mail:	

If more space is required, you may list additional IP addresses with present usage of such on a separate sheet of paper and attach it to the end of this form.

Number of IP addresses requested:

Note: If your organization already has IP address space assigned, you must utilize 100% before applying for more IP address space.

Please use the space provided below to list the services you will be using that require a discreet IP address and their purpose. Typical services include email servers, web servers, private nameservers, FTP servers, firewalls, routers, and SSL servers. **Please include a basic diagram of the network that utilizes the requested IP addresses, showing each device.**

(network diagram showing devices)

Confirmation of request:

I hereby certify that I am authorized to represent the organization named above and that the all the information provided on this form is true and correct to the best of my knowledge. I understand that Internet Protocol Version 4 address are limited and that users of the Internet are responsible for conserving IP addresses and ensuring efficient IP address utilization.
